Philanthropy Camp 2009

Raising the bar for service learning, giving back and all the components of the philanthropic spirit. The program will be a 5-day overnight camp experience. It has been developed to provide an in-depth educational experience into the business and commitment of the non-profit, foundation, cause related marketing and global greater good professional. A vital component of our mission will be to present 'how it's done and why they're doing it.' The students will hear the life experience and journey of each speaker into the non-profit world. The sessions will include presentations by foundation leaders, development professionals, college admission representatives, street volunteers, grant writers, corporate marketing professionals, non-profit strategic planning professionals, and presidents of boards and foundations.
